

# Installing PS Remote Control LibUSB driver

---

Open folder `\Tools\PSDriver-LibUSB\`

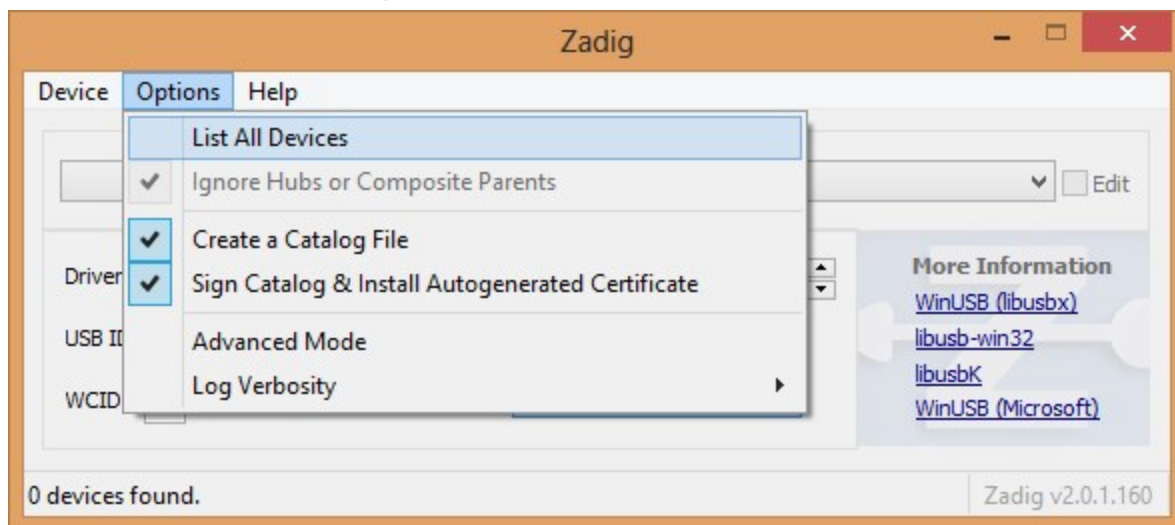

Choose appropriate version of utility:

- for Windows XP use **zadig\_xp.exe**
- for Windows 8/7/Vista use **zadig\_vista-7-8.exe**

Run zadig utility

Choose List All Devices in Options menu

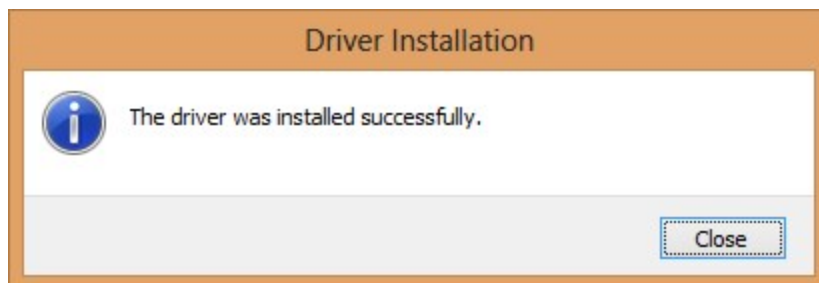

Choose appropriate device in the list ("PS Canon PowerShot <camer model> <firmware version>" or "PS Camera Remote Control")

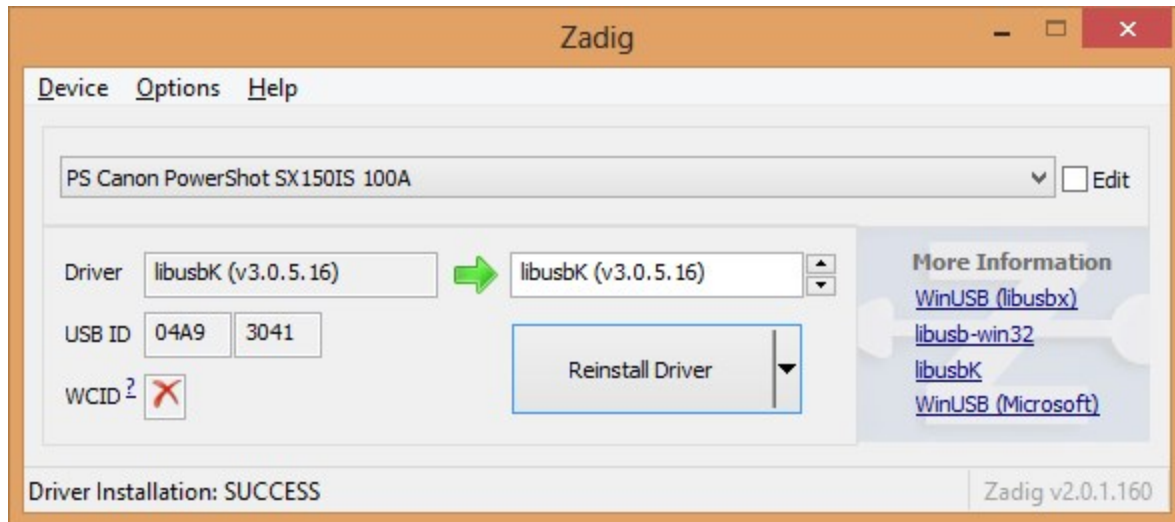

Choose libusbK (v.3.0.5.16) as Driver and press Replace Driver button:

Driver will be installed, you will see the message if driver installed successfully.

Check new value for Driver - libusbK (v.3.0.5.16)

Now PS camera will use libUSB as USB transport.
